

INSTRUCTION MANUAL

LED DRAWING BOARD

COMPONENTS

- LED drawing board
- USB cable
- User manual

TECHNICAL SPECIFICATIONS

- Material: acrylic
- Rated power: 3.5W
- Working current: 0.6A
- Luminous intensity: 300–350lm
- Light source: LED
- Power: 5V–12V DC
- Dimming: three-level dimming
- Size: 335 x 235 x 3.5mm
- Working area size: 300 x 210mm

FEATURES

1. Touch button
2. USB power port
3. Acrylic plate
4. USB cable

OPERATION

1. Put the LED drawing board on a table or a flat surface, then connect it to the power supply with the included USB cable. You can connect the USB cable directly to a computer, power bank or you can use an appropriate wall charger.
2. Hold the touch button to power on the LED drawing board. Press the touch button again to adjust the brightness of LED lights. The board has 3 different levels of brightness.
3. Put the artwork on a lighted area and lay a blank paper over it to sketch on it.
4. When the sketch is finished, turn the power off.

IMPORTANT

1. Micro-USB/5V, General USB transfer interface, charging adapter, portable power source or computer can be used to power the device.
2. Use paperweight below 300g so that the transmission of light will be better.
3. The drawing board has adjustable brightness. Adjust it to your needs so it gives less discomfort for your eyes.

4. When using the drawing board dim the room lights so the effect will be better.

WARRANTY

The warranty is valid for 12 months, and you can send your claim to the seller (us), through the contact details listed in the bottom right corner. To submit a warranty claim, send the order number and date of your purchase.
